PM Emphasizes India's Commitment To Vision Of 175 GW Of Clean Energy

PM's Roundtable On Renewable Energy

San Jose, California, 28.09.2015, 17:13 Time

USPA NEWS - The Prime Minister, Mr. Narendra Modi at the Roundtable meeting on Renewable Energy, in San Jose, California on September 27, 2015.

Among the views expressed at the roundtable, was a clear assertion that India has the makings of becoming the "clean energy world capital."

The Prime Minister Mr. Narendra Modi chaired a roundtable meeting on renewable energy, with top energy CEOs and experts, in San Jose on September 27.

Dr. Ernest Moniz, Secretary of Energy, United States and Prof. Steven Chu, former US Secretary of Energy were present at the roundtable meeting.

Top energy CEOs and investors, including Ahmad Chatila, CEO SunEdison; Nikesh Arora, President and COO, Softbank; K.R. Sridhar, CEO, Bloom Energy; Jonathan Wolfson, CEO, Solazyme; John Doerr, Venture Capitalist; and Ira Ehrenpreis of DBL partners were present.

Prof Arun Majumdar, Prof Roger Noll, Dr. Anjani Kochar, and Prof. Sally Benson, all from Stanford University, participated.

Among the views expressed at the roundtable, was a clear assertion that India has the makings of becoming the "clean energy world capital."

The participants said that clean and renewable energy will soon be an inexpensive energy option, with electricity storage becoming cheaper. Participants were of the view that States and Cities in India should be allowed to take the lead in clean energy initiatives. A related thought was that the current grid is not designed for carrying the 175 GigaWatts (GW) of renewable energy that India is targeting, and therefore a complimentary effort is required on the grid side.

Private investment was emphasized as vital for realizing the vision of 175 GW, with a parallel example being given of how Israel had solved its water shortage using private investment.

Experts were of the view that India has to address issues in four key areas " viz. technology integration; finance; regulatory frameworks; and the right talent pool. They also expressed concern at the financial status of power distribution companies (Discoms) in India.

The CEOs present gave a brief overview of the technologies and innovations being used in their companies. In addition to solar and wind energy, biomass was also suggested as a key provider of clean energy.

The Prime Minister thanked the participants for their views, and emphasized India's commitment to realize the vision of 175 GigaWatts of clean energy. He said there is massive scope of investment in the sector, for example, through the Railways, where 100 percent FDI has been allowed. He said the Government is working to address issues in regulation, and address the financial health of Discoms.

The Prime Minister also gave an overview of initiatives already undertaken in the area of renewable energy, such as Kochi Airport becoming a solar-powered airport, and solar panels being installed over a canal in Gujarat. He said that early next month, a district court in the tribal belt of Jharkhand will become entirely solar-powered. The Prime Minister also mentioned coal gasification as an important area of research. He expressed confidence of a renewable energy revolution over the next decade.
